- Enhance the built-in procurement system by adding new features.
- Write a mobile API to integrate with a Flutter mobile app.
- Enable multi-level approval based on the procurement amount.
- Define user roles and approval levels.
- Enable to view budget/fleet assign and procuremnt confirm and pending report by filter.
- Data Import and Export.
- Performance test with Jmeter.

Team Lead - 6 members

Hotel Management, CRM (Odoo 15, Python API, PostgreSQL, Nginx)

- Enhance the built-in procurement system by adding new features such as lead, pipeline, customer and sale list by pipeline API with filter.
- Enable to view the pipeline, lead report
- Collaborate with the developer to troubleshoot issues.
- Write CRM Mobile API to integrate with mobile (Flutter).
- Developed and implemented custom hotel management software, enhancing front desk operations, room reservations, and guest check-in/check-out processes.
- Run schedule with night audit process.
- Deploy the project on the Azure platform with load balancing.
- Integrate hotel system to Odoo ERP with flag.
- Join the customer requirement meeting regarding new feature discussion.

Jan 2019- May 2022

Senior Developer

Workflow Management System (Java Spring Boot, Spring, Angular, MS SQL)

- Enable to create dynamic document template and create document with different approval flow.
- Enable to use approval matrix.
- Enable to approve with hand writing note and sign.
- Enable to skip and forward approval step.
- Enable to preview document with approval sign.
- Enable to send back document and reject by approval document
- SAP integration for invoice.
- Access permission for Users Level and Security Control

Dec 2015- Dec 2018

Developer

Agricultural Content Management System(Mobile App and Web Service)(Java Jersey, MS SQL)

- Access and review the data presented on the dashboard.
- Filtering content based on content type and date range, Implementation of content pinning/posting feature
- Retrieve the user's location using latitude and longitude data from the MIMU database.
- Implementing varying content views based on user preferences ,functionality seen on platforms such as Facebook
- Integrating advertisements into new feed streams, and enabling user registration via phone number
- Implementing OTP-based login and providing multi-device support for user authentication
- Introducing group functionality and incorporating image resizing capabilities
- Implementation of access permissions base on user levels.

Jan 2014- Oct 2015

Aceplus Solution (ACE)

Quality Assurance

Insurance Project (JavaServer Faces (JSF), MSSQL)

- Conducted system testing, bug fixing, and performance optimization.
- Provided technical support Setup Data Implementation and Configure system settings.
- Provide Key Users Training and conducted UAT session.
- Prepare User Manual and feature testing with test-case.
- Provide support to customers both online and by visiting their offices.
- Successful Go live and Post live support.

CORE SKILL

Technology	• Java •Python •HTML •CSS •JavaScript •TypeScript
Framework	• Spring boot •Spring Rest •Angular •Restful
Database	• Microsoft SQL Server •PostgreSQL •MySQL
Cloud Platform	• Microsoft Azure •Digital Ocean •Tomcat •Nginx
Version Control	• GitHub •GitLab
Tools	• Microsoft Visual Studio •Spring Tool Suit •Eclipse •Postman •JMeter •Swagger • Microsoft Office Suit(Word, Excel, PowerPoint)

Skill • Innovative • Strong decision maker • Complex problem solver • Creative • Resistance to stress	Language • Myanmar (Native) • English (Intermediate)	Hobbies • Reading • Keep the mind sharp
